**RE: LETTER OF APPRECIATION**

Dear Mr. Nelson,

I am writing on behalf of JE Dunn Construction Company to express our appreciation for the work recently performed by Cutting Edge Glass on the UMB Executive Suite Project.

The UMB Executive Suite Project was a \$2.6 million, 10,000 square foot, museum quality interior renovation, located in downtown Denver, Colorado. The project was delivered by means of a design build delivery method. Countless hours of collaboration were required between owner, architect, and contractors. The quality and craftsmanship of the work is recognized by all that enter the space.

From the start of preconstruction through the completion of the project, Cutting Edge Glass has been a true partner in every aspect of the word. Your professionalism, communication, technical expertise, and teaming capabilities proved invaluable to the overall success of the project.

As Manager of our Special Projects Division, I have the experience of working with many different subcontractors in the Colorado marketplace. I can honestly say Cutting Edge is one of the finest I have worked with. You and your team have set a new standard of excellence from which other subcontractors in your field will be measured.

Stann, I look forward to working with you again on future projects. I would highly recommend you and your firm to any prospective clients. Thank you for your efforts.

Sincerely,  
JE Dunn Construction Company

Matt Schmitz
